The Steady Write® Sta-Pen™ Writing Instrument uses the friction of the base to smooth out the motion of your writing.

For best results follow these easy steps:

1. Place the Steady Write® Sta-Pen™ base on the writing surface.
2. Grasp the Steady Write® Sta-Pen™ base (not the pen) and press down, moving the whole unit as you write.

Note: You may have to experiment with different ways of grasping the base to find the best method for you.

For best results:
Do not hold any part of the pen. Press down on the base.
Do not raise the base off the writing surface as you write.
